Jaime Garcia Garcia

Banking Modernization GenAI | Senior Software Lead | BIAN
Getafe, Community of Madrid, Spain

Summary

My passion lies in combining technical expertise with leadership skills to achieve impactful results. I'm excited to continue leveraging my knowledge and experience to push the boundaries of technology and deliver value to our clients.

Experience

NTT DATA
7 years 3 months

Senior Technical Lead
July 2025 - Present (3 months)
Madrid Area, Spain

Leading cross-functional teams in banking technology modernization projects, bridging legacy systems with cloud-native microservices.

Driving initiatives in Generative AI–powered modernization, building platforms that transform legacy architectures into modern, scalable solutions based on BIAN approach.

Full-stack technical leadership: defining architecture, guiding development (frontend & backend), deploying in cloud environments, and coordinating delivery with business stakeholders.

Strong focus on innovation, AI agents, and automation to accelerate transformation in the financial sector.

Key Achievements:

Coordinated and delivered modernization efforts across legacy, backend, and frontend systems.
Designed and built from scratch a modernization platform leveraging cutting-edge AI, full-stack web technologies, and cloud deployments.

Contributed to moving client initiatives from proof-of-concept to scalable enterprise solutions.

Software Engineer Technical Lead
July 2022 - July 2025 (3 years 1 month)
Madrid, Community of Madrid, Spain

Allfunds Project (2022 – 2023)

Led coordination between backend (Java microservices), frontend (LifeRay), and mainframe teams to implement key enhancements in Allfunds' web portal. Designed and supervised the technical solution, ensuring seamless integration between legacy systems and modern microservices.
Contributed with hands-on frontend development tasks to support delivery goals.

Team: 8 engineers (4 front/back + 4 mainframe).

Key Achievements:

Successfully bridged legacy and cloud-native environments.
Delivered strategic product improvements in a highly regulated environment.

Senior Software Engineer
February 2020 - July 2022 (2 years 6 months)
Madrid Area, Spain

• Project Leadership: Leading software development projects, collaborating with clients, and assigning tasks to the team.
• Technical Design and Implementation: Designing and implementing software solutions and documentation as Technical Desings, Functional Specification Document including all needs and expectation confirmed during the analysis phase. Supervising and leading implementation of the code to different enviroments.
• Mentoring and Collaboration: Mentoring junior programmers, participating in code reviews, and promoting collaboration within the team.

Software Engineer
July 2018 - February 2020 (1 year 8 months)
Madrid Area, Spain

• Coding and Development: Write code, develop software solutions, implement new features, fix bugs, and optimize existing code following coding standards and best practices.

• Testing and Debugging: Test software functionality, perform unit testing, integration testing, and assist with system or user acceptance testing. Debug and troubleshoot issues reported during testing or by users to ensure software performs as intended.

• Collaboration and Learning: Collaborate with team members, understand requirements, share progress, and seek guidance. Actively participate in meetings, discussions, and code reviews. Continuously expand knowledge and skills by staying updated on technologies and industry trends.

Santander UK
Personal Banker
January 2016 - June 2018 (2 years 6 months)
London, United Kingdom

Relationship Management:

- Developed strategic financial plans for clients based on thorough needs assessments.

- Actively sought new leads and business opportunities to refer clients to specialized teams.

- Maintained up-to-date customer profiles and logged relevant information in the relationship portfolio.

Risk Management:

- Assessed account risk through analysis of account history to ensure appropriate service and product offerings.

- Conducted weekly risk management activities, including meetings and action plan development.

- Reported findings and implemented internal procedures to the operational risk manager.

Digital Champion:

- Played a key role as part of a small team, serving as a digital advocate and ambassador.

- Created and participated in events and presentations to showcase Santander's mobile apps.

- Provided technical support to customers visiting the branch to resolve any issues.

Banco Santander
Internship Trainee
November 2014 - December 2015 (1 year 2 months)

Madrid Area, Spain

• Co-organizing the international multi-channel workshop for Santander Universities, in order to manage an international strategy for the new digital channels in the 12 countries where we are present.
• Community Manager of three different virtual communities with more than 500 members from 18 different countries with the goal of coordinating best practices in Santander Universities of each country and subsequently implementing them.
• Demonstrated senior management with strong organisational skills and an ability to work well under pressure.
